### **Scope Note**

Biographical material, correspondence, writings and research, organizational affiliations, photographs, and scrapbooks comprise the papers of radiologist, Dr. William E. Allen, Jr. (1906-1981). The papers span the period of 1915-1981 and measure approximately 47 linear feet.

Dr. Allen's achievements and interests can be traced through diaries that span 1926-1980 and provide a daily record of his life. The series, Correspondence, provides valuable insight into his professional and personal relationships and activities. Included are correspondence with many medical leaders and contemporaries of Dr. Allen.

Dr. Allen was one of the first African Americans to become a leader in the field of radiology. He graduated from Howard University College of Medicine in 1930 and then moved to St. Louis, Missouri where he established his noteworthy medical career. The series, Hospitals, highlights the roles he had as radiologist at such St. Louis hospitals as People's Hospital, Homer G. Phillips Hospital, and St. Mary's Infirmary.

The series, Writings and Research, documents Dr. Allen's prolific contributions to the field of radiological research. He was especially concerned with medical conditions affecting African Americans. In addition to his research and his medical positions, Dr. Allen was involved in many professional organizations, serving on boards and committees of such organizations as the National Medical Association, the American College of Radiology, and the Tuberculosis and Health Society of St. Louis.

Outside of his professional interests, Dr. Allen was also deeply involved in his role in the military. He served in Howard University's R.O.T.C. program and then went on to become an officer in the 366th infantry stationed at Fort Devans, Mass.

**Scope Note** continued

During World War II, Dr. Allen was stationed at Fort Huachuca, Arizona where he was the Chief of the X-Ray school. Dr. Allen's military career is documented in the series, Personal Papers.

Dr. Allen donated his papers to Moorland-Spingarn Research Center upon his death on December 31, 1981.
