CAR COVER.

BE IT KNOWN, that I, Charlotte J. Lankford, a citizen of the United States and a resident of Washington, District of Columbia, have invented a certain new and useful improvement in covers for automobiles, and I do hereby declare the the following is a full, clear and exact description thereof.

The object of this invention is to provide light weight covers for the protection of automobiles parked on the streets, and where the Owners live in apartments, or have homes without garages, and cannot rent, or find garage space in his or her immediate location available.

The invention consist of a cover which protects the body of the car, and which is made of a rubber or cellophane material and same will be equipped with snaps, which will enclose the whole body down or beyond the running board from weather conditions, dirt, dust, leaves, etc. There will be a designated space for duplicate tag numbers, also the make of car, and the name of Owner, is so desired.

The cover will prolong the finish of the car, as it will keep it protected from dust, grit, leaves, or spraying fluids when left out in the open or under trees.

The materials will be of such that will resist ice or snow from banking. When cover is not in use, it can always be folded or wrapped and place under car seat.

Materials of said cover will be very light in weight, and when not in use can be placed in a small bag. Covers will come in various colors and will be priced according to the quality of the materials used.

Having described my invention, and what I claim will be of great benefit to car owners, I desire to secure a patent on Improved Car Covers.

In testimony that I claim the foregoing as my own, I have hereunto affixed my signature in the presence of two witnesses.
