HOWARD CONFIDENT.

TWO BIG GAMES TOMORROW!

Varsity versus Shaw,
at Raleigh,
—AND—
Preps vs Baltimore High School,
on University Campus. Game called at 3 o'clock.

NEVER has there been more interest manifest in football than now. Day after day, large crowds of enthusiastic students gather along the side-lines eagerly cheering and admiring the earnest work of the two teams. All feel confident of a double victory tomorrow. Though the second team has been somewhat handicapped by the loss of some of its men (owing to the fact that Baltimore refuses to play any others than Preps), the strength of the team is not greatly altered, for, as is generally known, many of our best players are in the Preparatory Department. The Baltimore authorities must have either overlooked this or aimed to take advantage of the absence of the Varsity team. There is no possible chance for the visitors to win. In fact, it is thought that they themselves only hope to score—which in itself is quite an honor, since no other team has been so successful. The team of 20 will be entertained at Miner Hall. A large delegation from Baltimore will be here to cheer their team in its courageous endeavor. A large crowd is expected, since the game will be of especial interest to the teams of the local schools.

While interest and confidence and enthusiasm run high in anticipation of tomorrow's game on the Hill, fear and anxiety characterize the feelings of those who happen to know the difficulty arising in the selection of the best fifteen men. Sentiment and other considerations are always liable to bias good judgment. The team will suffer greatly from the loss of Baton, the right tackle. All feel sure that if the proper selection is made a team can be formed that will easily wallop Shaw, but up to 2 o'clock Thursday the captain was unable to give the line-up.

The line-up for the Preps is as follows:
- Right End—Williams, Giles.
- Right Tackle—Junior, Brown.
- Right Guard—Harris, Cowan.
- Center—Miller.
- Left Guard—Scott, Daggler.
- Left Tackle—Steel.
- Left End—Brown, Young.
- Right Halfback—Walker.
- Fullback—Hunt.
- Left Halfback—Cook.
- Quarterback—Flemming.

Teachers' College Notes.

The work of the current year has opened auspiciously. The attendance is about the same as last year notwithstanding the fact that more than a dozen students have been refused admission because not up to college requirements. The enrollment is eighty-nine.

The addition of Prof. W. A. Joiner to the Faculty strengthens the course and the efficiency of the work in many ways.

The establishment of the model kindergarten furnishes the kindergarteners with new opportunities for observation and practice.

Scientific Briefs.

Two Tuscan engineers have discovered a new metal alloy, called "radium argentiferrum," which is said to have greater strength than steel, freedom from oxidation, and to be a better conductor than copper. It is composed of copper, iron and infinitesimal portion of silver, radium and phosphorous; though the fundamental secret of the invention lies in the phosphorous. The discovery was mainly the result of an accident.

Sir William Ramsey exhibited at a scientific gathering the latest novelty in science, being the nearest approach yet to perpetual motion. By means of an exceedingly small quantity of radium salt a fine piece of goldleaf or feather is electrified; it bends away from a piece of metal until it touches the side of the vessel and loses its electrical charge; then it springs back and is again electrified, the process being repeated any number of times, practically like the swinging of a pendulum. A clock of this kind is conceivable, and, as it would persist as long as the radium retained its power, we might have a timepiece going for, say, 2,000 years and never requiring to be wound up.
A distinguished American admiral, who has been studying the present critical situation says that if Japan should lose two of her battleships now she could not possibly hold the sea against Russia.

Who will win the football trophy?

Regular meetings of the Alpha Phi and Eureka literary societies tonight, at 8 o'clock.

To New Students.

Don't be too fresh and don't get old too quickly.

Don't fail to room on the Hill.

Don't "cut" and don't try to bluff.

Don't go all the time, but come out and yell for the team.

Don't fail to join the Athletic Association.

Don't miss a single football game.

Don't think we're looking at you all the time. We don't know you're here.

Don't fail to respect "Profs." and upper classmen.

Don't fail to attend the literary societies.

Don't borrow The Journal. Buy it.

Don't forget the football trophy contest.

Personal.

Mr. T. C. Jordan is still ill, but hopes to be out next week.

Mr. S. Coleridge Taylor visited the University yesterday. He promised to be with us again next week.

Miss Oone Hutchins is with us again.

Misses Marie Brown and Lela Ewing are convalescing.

Mr. Mackanva, a young man from Africa, has been seriously ill for quite a while; but is now improving.

Appropriations Made at Meeting of Freedman's Aid Society.

Manchester, N. H., Nov. 7.—The Freedman's Aid and Education Society, in session here today, discussed industrial work in the South, and voted appropriations to colored schools of collegiate grade. Fourteen appropriations aggregating $66,000, were made, those exceeding $2,000 being as follows: Gammon Theological Seminary, $12,000; Claffin University, Orangeburg, S. C., $8,500; Clark University, Atlanta, Ga., $7,200; Walden University, Nashville, Tenn., $7,000; Morgan College, Baltimore, $5,900; Rush University, Holy Springs, Miss., $5,400; New Orleans University, New Orleans, La., $5,000; Wiley University, Marshall, Tex., $3,500; Philander Smith College, Little Rock, Ark., $3,000; George R. Smith College, Sedalia, Mo., $2,900; Bennett College, Greensboro, N. C., $2,600.

A man may pose as a sculptor without cutting much of a figure.

The blindness of love enables young people to economize on gas.

Mr. M. H. Carter, in McClure's, says: 'If you have never taught school, you probably imagine that the most important problems in education consist in the solution of such questions as the relation of the state to the schools, the secularization of the schools, and the application of correct principles in the instruction to the development of the child. I did, once. Then I began to teach. At the end of the year I knew that the Problem, the all pervading, all overshadowing Problem, was the Parent. Weekly, sometimes daily, was my ingenuity taxed to its utmost to meet, and if possible vanquish, the indifferent parent, the inconsiderate parent, the meddlesome parent, the fond parent, the proud parent, the troublesome parent, the nate parent, the ignorant parent, the enlightened parent, but in the end the parent prevailed.'

A certain Junior who spent the summer in Saratoga thinks that rather personal questions are asked him in the classes in Political Economy. He can't understand why it always falls to answer such questions as these: "What is the cause of hard times?" "What is the cause of the scarcity of money?"

The excess of Canada's export trade in 1902 with Great Britain over the United States was $42,000,000; in 1903 $57,000,000,
Medical Notes.

The Medical College has entered upon its year's work under very auspicious circumstances. The faculty is composed of most obliging, good-natured instructors, very enthusiastic in their work, and the students for the most part are satisfied and happy.

The Freshman Class is not so large as that of a year ago, and their quiet, gentle bearing stands out conspicuously as against the rude deportment and the wild shouts which characterize the wise men who are now passing into their last stage of embryonic life. Since it is the empty cart that makes the noise, and quality more than quantity that counts, the Presides should not be discouraged.

"Go around the long and narrow road, young ladies and gentlemen! Don't go through the dark woods, for the Bears will surely get you!" says a prominent member of the faculty. There was a meeting of the Bears in the forest last week and no doubt they caught someone, for there are now several strange faces among the Juniors, Sophs, and Freshies, and I am sure the last day of matriculation has long since passed. Come forward, fellows! Don't sneak in and take a back seat. We know you. You are not strangers in a strange land.

Professor A: "Mr. B., what is the dose for carron oil?"

Mr. B: "2 to 4 dr."

Professor A: "Metric system?"

Mr. B: "8 to 30 gm."

Don't be alarmed! He was a Freshie.

Theological Department.

There is a large Junior class this year, many of whom are from the West Indies.

Mr. H. A. Pettus, of the class '06, has just returned from Pittsburg, Pa., where he spent the vacation.

The Juniors and Middlers are having their usual "scrap" over church history, and Prof. Bwell is referee. We hope no one will get hurt.

The elementary Hebrew class is the largest in the history of the department, and of course the best. One member of the class is so good that his name is Best.

We are pleased to welcome Mr. J. B. Redmond, who comes to us from the Northwestern University.

The officers of the Theological Literary Society for the term are: S. B. Ross, president; P. B. Oldham, vice president; W. H. Best, secretary; P. Pennick, chaplain; T. G. Clark, sergeant-at-arms. The work of critic is kindly done by two members of the faculty, who are present at every meeting.

The Livingstone Missionary Society's announcements will be made in our next issue.
Howard University

Incorporated by Act of Congress March 2, 1867.

THE SECRETARY OF THE INTERIOR, HON. E. A. HITCHCOCK,
Patron Ex-Officio.

The Rev. Thomas S. Hamlin, D. D.,
President of the Board of Trustees.

Rev. John Gordon, D. D.,
President.

Mr. Geo. A. Saafford,
Secretary and Treasurer.

Rev. Isaac Clark, D. D.,
Dean of Theological Department.

Robert Reyburn, A. M., M. D.,
Dean of Medical Department, including Medical, Dental, and Pharmaceutical Colleges.

B. F. Leighton, Ll. D.
Dean of Law Department.

Rev. F. W. Fairfield, D. D.,
Dean of College of Arts and Sciences.

Rev. Lewis B. Moore, A. M., Ph. D.,
Dean of Teachers' College.

George William Cook, A. M.,
Dean of Commercial Department.

George J. Cummings, A. M.,
Dean of Preparatory Department.

Fred C. Whitcomb, B. S.,
Director of Manual Training School.

OBJECT.

This University was founded in 1867, "for the education of the youth in liberal arts and sciences." It stands distinctively for the higher education of the colored race but eduaxes men and women of all races from all the continents and from many islands.

DEPARTMENTS.

It has eleven distinct colleges and schools: Theological, Medical, Dental, Pharmaceutical, Legal, Teachers, Collegiate, Commercial, Preparatory, Manual Training, and Summer School, which are conducted by one hundred and twenty-five competent professors and instructors.
