General Assembly Approves HUSA Budget

By ROSS A. HANSON, Editor-in-Chief

The 2000-2001 HUSA administration should have a smoother ride next year after Wednesday’s General Assembly approved its budget Thursday.

The General Assembly budgeted $34,709 for the General Assembly without much trouble. In 1999, President-Elect Elysehah Brown was relieved by the prompt approval.

Now that the General Assembly should have a easier time getting out without budgetary problems which plagued other administrations, "I think this is a big step in the right direction," said Michael Winters, current graduate student and HUSA Vice President.

Winters said the budget was approved without much discussion by the General Assembly, which was met with "much applause." The General Assembly approved the budget in just 10 minutes.

The budget allocated $15,000 for the General Assembly, $12,000 for the student government and $7,000 for the Bison Ball.

"There were no hard feelings about it," said Michael Winters, current graduate student and HUSA Vice President.

The entire HUSA administration, except for the student government, was present and quite pleased with the approved budget. "I am happy with the budget," said Council Secretary and HUSA Vice President Kenisey Brown.

The Assembly also added an extra $3,000 for the staff. "I think Brown and Dixon fielded questions on every staff, they were well prepared and informed about their allocations," said Michael Winters, current graduate student and HUSA Vice President.

"I think that's a positive step in our new allocations," said Michael Winters, current graduate student and HUSA Vice President.

Will You Donate Money To Howard After Graduation?

"I intended to. I think it is important to give back."

-Michelle Johnson
Senior Biology major

"Most definitely, I feel that attending the University is obligated to give back. To attend Howard University is such a great opportunity and I would want my contributions to benefit other students throughout the years."

-Marsha Nivis
Junior Business Management major

"I probably might give back to Howard or sponsor a scholarship so that the students will more opportunities."

-Leland Watson
Senior Electrical Engineering major

University of Pennsylvania Rehanging Reliantly on Tuition

Penna All Penn, on the other hand, finances 3 percent of its budget with gifts from endowments. Princeton’s endowment is worth more than Penn’s, checking in at over $7 billion for FY 2003.

School of Arts and Sciences Dean Sabri N. Pataki said that there is a dynamic connection between the state of a school’s endowment and the salary that its professorial staff is willing to accept.

"If I absolutely don’t have to go back to the University town once. I just want to have people stay focused on what we can afford for and keep high morals and responsibility."

Northwestern University

A step further, employing many services to mitigate high prices. To purchase books, students enter the online bookstore where they can choose from a variety of textbooks available. The bookstore offers a comprehensive selection of textbooks, including new and used options. The store also provides textbooks for sale, allowing students to sell their books back to the store.

Some students prefer to buy textbooks at local bookstores or online, as these options provide a wider variety of textbooks. Others prefer to purchase textbooks directly from the university bookstore, as this option is more convenient.

Howard to Host HBCU Christian Leadership Conference

By Kendall Currie

Assistant Staff Writer

Howard will host the first Historical Black College University Christian Leadership Conference in April through May.

The summit, sponsored by the Howard University School of Divinity, will feature a series of programs and events focused on "empowerment" and "unite." The conference will bring together African-American leaders from across the country.

"This is not a time for passivity and complacency," said Howard President Dr. Daniel A. Olmstead. "We are challenged to do more to combat the many issues facing our communities."

Howard has already started planning for the conference, organizers say. "I am so excited for the Commissioned Officers," said Howard's Dr. Deidra M. Johnson. "The event will give them an opportunity to use the resources available to them, and to connect with other leaders in their field."

More than 50 organizations have expressed interest in using the conference to advance their goals.

"The conference is a powerful tool for promoting our values and vision," said Howard President Dr. Daniel A. Olmstead. "We are looking forward to an event that will help us to continue to work towards our goals."
Horowitz Denies Need For Slave Reparations at MIT Debate

By CAMBRIDGE, Mass. (WIRE) — David Horowitz continued his crusade for reparations for African Americans yesterday after a debate at MIT and spoke again this morning at the National Coalition of Blacks for Redress. Horowitz has attracted a great deal of media attention for his views on reparations, and his speeches have often been met with controversy.

Horowitz has argued that the descendants of African Americans are entitled to reparations for the impact of slavery and segregation. He has also called for the government to pay for reparations to African Americans in order to compensate for the damage caused by slavery.

Campus U.S.A.
Harvard University

Because there would be no way to determine which of the African slaves were compensated, Horowitz said that reparations would not be effective. “The idea of reparations is not a realistic solution,” he said.

Horowitz claimed that reparations would only be a way for the government to avoid dealing with the issue of slavery. “The government would not be willing to pay for reparations because it would be too expensive,” he said.

Campus U.S.A.
University of Maryland

On October 2, 2023, a protest was held on the University of Maryland campus to demand reparations for African Americans. The protest was organized by the UMBC United for Reparations Committee and was attended by hundreds of activists.

During the protest, speakers called for reparations to be paid to African Americans as a way to address the legacy of slavery. “We demand reparations for the harm that has been done to African Americans,” said a speaker.

Mayor Wants U Md. State, County to Pay Damages

By RAYMOND H. CYPHER, The Diamondback

The mayor of Annapolis, Maryland, has called for the city to pay reparations to African Americans for the impact of slavery. “This is a moral obligation that we must fulfill,” said the mayor.

The mayor’s call for reparations comes in the wake of a new report that found that African Americans in the city were more likely to live in poverty and experience discrimination.

DC Squirrels: The Tale Behind Why They're Taking Over

By John B. Jones

Hilltop Staff Writer

You see them running around campus more than you can possibly count. They scurry before your very eyes, never quite fast enough for you to catch up. They run through garbage cans and scavenge for trash. Sometimes you find them at your feet or even on your back. They're everywhere.

As with most of the U.S., the Hilltop has an overabundance of these little critters. The black squirrel seems to be the most prevalent. They're so common that you hardly notice them, but they're everywhere.

Starburst when I accidentally dropped the candy. Before I could bend over to pick it up, the squirrels were all over me. They're bad, they're scroungers, and they're really annoying. But I love them anyway.

Recently, I've been noticing them more. I see them all around campus, even in the library. I've started to wonder why they're so abundant. Is it because of the food we throw away? Or is it because of the trees and shrubs we've planted?

As I walk through campus, I can't help but notice how many of them there are. They're everywhere, from the library to the gym to the dorms. They're even in the classrooms, changing the way we learn.

The Gospel According to Droopy

By Elizabeth D. Brown

Hilltop Staff Writer

Droopy, the beloved cartoon dog, has become a figure of inspiration for many. His simple philosophy of "What you got is what you get" has become a mantra for many in their daily lives.

In the world of Droopy, the emphasis is on the positive. Droopy never complains about his lot in life. He simply accepts what he has and makes the best of it.

Droopy's philosophy is not just limited to his cartoon universe. Many people today are adopting Droopy's message of acceptance and positivity. His message is one of hope and resilience in the face of adversity.

Droopy's message is one that resonates with people of all ages and backgrounds. His simple yet profound philosophy is a reminder that in the face of challenges, we can choose to focus on what we have rather than what we lack.

Droopy's influence is evident in various forms today. From motivational speakers to self-help books, his message has been adapted and expanded upon to reach a wider audience.

In conclusion, Droopy's message of acceptance and positivity is a reminder of what is truly important in life. It is a reminder that in the face of challenges, we can choose to focus on what we have rather than what we lack. His message continues to inspire people of all ages and backgrounds, and it will continue to do so for many years to come.

Iowa State Having Budget Problems: Baseball, Swimming Suffer

Iowa State University's Athletic Department has decided that they will drop baseball and swimming programs effective the next school year.

University officials said after reviewing the budget projections and other "non-sport-related challenges," the board of directors is eliminating these two programs.

"We feel that it's difficult to achieve success in both baseball and swimming when compared to other mid-major conferences. With the Big 12 Conference," Iowa State athletic director Bruce Van De Velde said Monday.

The board of regents formally approved the cuts Tuesday. Van De Velde said the decision to drop both programs will result in $1.4 million in budget savings.

Baseball has been played at ISU since 1982, making it the school's oldest team along with football, men's basketball, and diving dating back to 1916.

Shawn Kemp to Enter Rehab, Will Miss the Rest of Season

Shawn Kemp's season with the Portland Trail Blazers has been down but not out.

The team announced Friday that Kemp was admitted to a four-week drug rehabilitation program.

The team said he will return to Portland from the NBA's Gansevoort House in New York City following his stay. Kemp was briefly hospitalized in Chicago for "personal reasons." Tuesday, and was placed on the 15-day inactive list.

The preliminary tests found bleeding in his brain.

Vision announcer Rex Hudler was hospitalized Saturday.

Physioc said he checked in with him Saturday morning.

Hudler, who retired from baseball in 1998 began broadcasting for the Seattle Mariners in 2000. After two years with the Mariners, Hudler returned to his roots, called games for the Chicago Cubs.

In 19 seasons with the Seattle Mariners, Hudler had a batting average of .261 and also 56 home runs and 156 RBIs.

U. Minnesota Women's Basketball Coach Defends Career as Probe Continues

By Tom M. Mulholland

UmnsDaily

UWIRE

University of Minnesota—Although the coach of the women's basketball team recently announced that she will leave the university at the end of next season amid an investigation into possible rule violations, one of the members of her program has decided to remain.

Linda Howlett, the program's star guard, decided to stay and finish her senior season as she and the team prepare for what could be a loaded Big Ten schedule.

"I feel that we must discontinue to maintain fiscal integrity and respect for the institution," said Mulholland.

"We are committed to the institution and our players and their families who trust us to take care of them."

However, Povich said he checked in with him Saturday morning.

Last year, the coach was suspended for one game for violating NCAA rules with regard to collecting gifts from the athletic department.

He did say that University officials approached Lavin to interview the high school coach at Bishop Montgomery High in Torrance for a job after his junior year at Centennial High in Corona.

Dalis said, "He said that Coach Lavin and I were in contact during the final four-a game that I ended up watching. The coach introduced his player to Coach Lavin and they just chatted."

The university could also be prohibited from some or all postseason play.

NCAA in April 1998, the NCAA imposed a probationary period for the athletic department and Louis and Lavin because of the improper contact.

The team could also be prohibited from some or all postseason play.
