ALBERT CASSELL PAPERS

Prepared by:
Joellen ElBashir and Helen Rutt
April 1995

SCOPE NOTE

Collection dates: 1925-1969

Size: Thirteen linear feet

Historical notes: Albert Cassell (1895-1969), architect, planner, and educator designed numerous structures, primarily in Washington, DC, Maryland, and Virginia. Cassell designed a wide variety of structures, including churches, office buildings, schools, and private residences. Some of his best known works include Howard University's Founder's Library, Douglass Hall, Power Plant, and Chemistry Building. Among Cassell's other works is Mayfair Mansions, a housing project in Northeast, Washington, DC, and several buildings on the campus of Morgan State College. One of his most ambitious efforts was the proposed development of a planned community in Calvert County, Maryland.

Scope and content: The collection is arranged into five series: personal papers, projects, photographs, inventories to rolled drawings, and oversize. Personal papers contains primarily correspondence, writings, legal and financial documents not related to a specific architectural project. Projects, the largest series, includes correspondence, drawings, reports and other materials pertaining to Cassell's works. The materials are arranged alphabetically by project name.

Notes: The collection also includes more than 1000 rolled architectural drawings. Letters added to distinguish series, April 2023.

Donor and date: Charles Cassell, 1975
