Students and Faculty Voice Concerns Over Technology Issues in Fine Arts Program

By Shala Wilson & Crystal Anderson

Hilltop Writers

In a quest to garner exposure for the arts department, officials dismissed suggestions that mass publicity would result from allowing students access to the computer system that affects students in the department in a negative manner.

Specifically, Art Department Chair Al Smith spoke to motives on what was needed to be brought attention to the program. According to Smith, the university’s program, Visual Information Design Art (VIDA), is in need of outside funding for the fine arts, and has a goal of increasing the university’s amount of publishing worldwide.

Smith said that the current building behind Childers Hall is described as only providing spaces for the blind and visually impaired, and that the Department of Mass and Moore, Bonsall Room, is in the process of being considered for the new 3-dimensional art facility. It has already been thought of with painting, welding and art conditioning along with the need to create a new facility. Equipment for welding, welding, and craft making has already been acquired.

Smith described the 3-dimensional art facility as a definite “step up.” He hopes to convince the administration to give the facility more attention.

In this first semester in the chairmanship, Smith wants to present “visual language” at Howard. He said language can be confused to 24 characters anymore. Instead, images, tone, sound, and motion are the languages American new speaks, according to Smith.

Smith said that in going towards visual language, it is the new making and writing of the 21st century that the students are learning, that the models will be broken down. Smith added that even University President H. Patrick Swygert’s Strategic Framework for Action Part II called for outside funding.

Smith wants to convey the message that “if you give us what we need, the art department will come to much.”

University Readies for Homecoming Crowds with Security Measures

BY THEA HARRISON

Weekend with Wrens

The start of Homecoming week brings about many things for students, almost and University officials, chiefly that the crowds are always ready to the campus.

“The year’s magnitude of guests is expected to well exceed past figures,” said Bob Rice, chairman of the 2001 Homecoming Planning Committee.

According to Jones, the year’s first fall will not only be the week of events, but the week that will be filled with events, but the week that will be filled with events, but the week that will be filled with events.

The high number and the event will put on 20,000 and more people for this year. Students support from freshman, the two and other members of the Howard University community,” said Bob Rice.

According to Smith, President of the Howard University Student Association, the event will put on 20,000 and more people for this year. Students support from freshman, the two and other members of the Howard University community,” said Bob Rice.

In efforts to prevent a parking shortage, the Howard University Parking Office has been working extensively on the campus to accommodate the mass amounts of guests expected to be on campus.

“Parking management is preparing for the mass amounts of guests expected to be on campus. We have complete faith in Howard campus police, who will be on duty to manage the parking all day,” said Bob Rice.

Workstudy Students Get Pay Increase

BY MARGARET ABStCHNO
Hilppol Staff Writer

In an attempt to attract student employment, the Office of Financial Aid and Student Employment at Howard University has increased wages as much as 25 percent for students.

Students awarded work study for the 2001-2002 academic year will earn an average of $5.01 per hour, named by students in previous years as the minimum wage. Professor of mathematics Dr. Bonnibon, and assistant professor of mathematics Dr. Bonnibon, have encouraged all students to accept the work study offer. Work study positions are available for fall, winter, spring and summer semesters, except for the summer of 2001, which is primarily reserved for the rising senior.

Howard needs to just invest in it. "One thing that they can improve from University of Maryland to here is the library system," said Steven Johnson, the associate director of the Graphic Design major. "I could make $12 per hour if it was not for Howard University Campus Police."

Northern crossers also noted that while the university has increased wages as much as 25 percent this semester, there is still not enough money to support students. "I was not able to get a job in the work study office," said student James Johnson. "It is just not worth it to me."

According to Steven Johnson, the associate director of the Graphic Design major, Work Study is many student's means to get set up in neighboring high schools that gives students the opportunity to work off campus. Students must go through a time period before they get paid to help them establish the work study program.

The average free of charge. "Maybe it is too much. I also think that the wireless access is a help."

RUSSIA CRIME REPORT

BY KERRY ANN HAMILTON
Community Editor

This semester I opted to do a study abroad, thus perpetuating our motto-London is the capital of the world and for the global community. The school is Richmond, The American International University of London, which lies in the city of London, England. For 25 years, the university has been a refuge for students from around the world. According to Steven Jones, the 2001-2002 academic director, the university has become a home for students from 60 countries, primarily from the Commonwealth countries, Europe, as well as American students.

Students are not only exposed to a global perspective but also cultural and racial diversity. "The university allows you to be part of the international community and it is just an array of social places and it is a great way to meet new people," said Steven Jones.

The race relations have been described by American students and students, as a clash of cultures and stereotypes, and also an array of different social places.

The race relations in the US and the UK are not as prevalent as in the UK. However, despite the mosaic of cultural and ethnic groups, the prejudices toward the other is arguably less covert than in the US, Sutton said. "The British view each other as races because it gives me the opportunity to give back to the United Kingdom."

Ashcroft Introduces Plan to Search Student Records

From A1
Sens. Barbara Boxer, D-Calif., and Dick Durbin, D-Ill., also have introduced legislation that would require colleges to screen students for future terrorist threats.

But Laurie Rebjohnos, a member of the Justice Department's terrorist threat task force, said the plan would probably not be used to screen students.

"We will not engage in widespread searches of educational institutions," Rebjohnos said. "We will focus on those individuals whom we determine are most likely to pose a threat to the United States."
African King Enacts Sex Ban to Curb the Rise of AIDS

By Anthony Wright

Covering World

After King Mswati III of Swaziland called on young women to stop having sex, the nation's health minister said, "It is the beginning of the end of AIDS in our country." King Mswati, 37, who has been on the throne since 1986, is the world's youngest ruler.

The bald, white-haired king, who has no wife and 13 children by different mothers, made the announcement during a televised address.

The king said the ban would not apply to marriage, and women who break the ban will be fined.

The ban is the latest in a series of drastic measures taken by African governments to combat the spread of the disease.

In neighboring South Africa, the government has imposed strict controls on the movement of people from infected areas.

In Botswana, penalties for sexual activity have been increased, and a strict curfew has been put in place.

In Kenya, the government has banned all commercial sex workers, and those who violate the ban will be fined and imprisoned.

In the United States, the Centers for Disease Control and Prevention has warned that HIV/AIDS is spreading faster than ever before.

The disease is now considered a global epidemic, with more than 36 million people infected worldwide.

In Africa, the disease is most common among young people, especially those aged 15 to 24.

In 2010, the United Nations reported that more than 500,000 children under the age of 15 died from AIDS-related illnesses.

The disease is spread primarily through sexual contact, with 95% of new infections occurring in this way.

In the United States, the number of new AIDS cases has declined in recent years, but the disease continues to spread among young people.

In Africa, the disease is often transmitted throughmother-to-child infection.

The disease is also spread through sexual contact, with 95% of new infections occurring in this way.

Bison Victimized By Rattler In Lopsided Loss

By ALLEN PERRY Southside Sports Writer

The Bison were Howard's eighth straight loss at the Rattler's, Paul's head coach. Joe. He said this fall's rivalry was a "very close game" and "one that we lost." The loss was the Tigers' second straight, and they have not been beaten by a team that has beaten them for their current winning streak. The Rattlers had not beaten Howard in a series that dates back to 1992.

The Bison (11-11, 3-6 MEAC) fell to the Rattlers (17-30, 23-20, 22-30), 129-75, in Cameron Hall Saturday. Howard had not lost a game to the Rattlers since 1992.

The Bison had a 48-32 lead at halftime but couldn't hold on as the Rattlers outscored them 97-37 in the second half.

"This was the biggest loss we've ever had," said Joe. "This is a big loss for us, but it's something we can learn from. We'll use this experience to grow and improve." The Bison (11-11, 3-6 MEAC) fell to the Rattlers (17-30, 23-20, 22-30), 129-75, in Cameron Hall Saturday. Howard had not lost a game to the Rattlers since 1992.

And We're Suppose To Be Teases?

By TIFFANY D. JACKSON

'And We're Suppose to Be Teases?'

Delicate word that's thrown around like promotion flyers. This city especially, I highly doubt it. But tease is such a word you can't just use anywhere; you can't use it carelessly. If you were a child, you wouldn't even have to think twice about using it. But as you grow older, you realize this (art) is what you want to do, you're faced with the responsibility of taking care of yourself.

So. before you jump to conclusions and brand all girls as teases, consider the situation. Right Reasons.

I saw her face. Her body was full of blood, and her face had a look of pure terror. Her mouth was open, but she couldn't seem to speak. I didn't know what had happened, but I knew there had to have been an earthquake in her house. I prayed over and over again. As I fell to the ground, I knew that I was the only one who could save my dying friend. I did not know what had happened, but I knew there had to have been an earthquake in her house. I prayed over and over again. As I fell to the ground, I knew that I was the only one who could save my dying friend.

So, before you jump to conclusions and brand all girls as teases, consider the situation. Right Reasons.

Election

For All the Right Reasons

By AMELIA BLACK

Why should a man have to interrupt a woman?... It's 107% his world. I received his telephone call. She called to inform me that her first love was over. I realized that his love was not my love. I felt my heart breaking. He said, "I know you love me, but I love myself too much to be with you."

I felt the tears rolling down my cheeks. "Lord, protect my family," I cried."

From that moment on, my personal feelings about marriage and love were changed. I decided to fight for what I believed in, and willing to speak out against injustice. I knew that I was going to be a voice for the voiceless. I knew that I was going to be a fighter. I knew that I was going to be a warrior. I knew that I was going to be a leader. I knew that I was going to be a advocate. I knew that I was going to be a fighter. I knew that I was going to be a warrior. I knew that I was going to be a leader. I knew that I was going to be a advocate. I knew that I was going to be a fighter. I knew that I was going to be a warrior. I knew that I was going to be a leader. I knew that I was going to be a advocate.

Lou Stovall’s exhibit, ‘The Art of Silkscreen Printmaking’ will be displayed at the art gallery of the Lulu Vere Childers building through October 31.

Lou Stovall: ‘The Art of Silkscreen Printmaking’

BY JAMALL CLEMMER WHITE

Lou Stovall: ‘The Art of Silkscreen Printmaking’

Lou Stovall, a 1966 Graduate of Howard University, studied art under the direction of Jacob Lawrence. After graduating from Howard University, Stovall studied and worked in New York City. His printmaking work is featured in the collections of many museums across the country.

The way Stovall expresses himself in his painting is a work of art in itself. His work is physically beautiful, capturing one of the key elements of his subject matter, casting one of his greatest strengths. His work is truly beautiful, capturing one of the key elements of his subject matter, casting one of his greatest strengths.

An Equal Opportunity Employer M/F/D/V
In recent years, the University has made subsequent strides in remaining true to the motto "Leaders of America and the Global Community," coined by President C. Paul Swagert in 1971. Since then, the introduction of the phrase, the University has made two notable large leaps forward in the field of information technology. These leaders are prepared for their roles.

Late in the spring 2000 semester, students were introduced to the multi-million dollar iLAB that replaced the inadequate computer lab in the basement level of the School of Communications and the limited number of computers available on the ground floor of the University Library. And more recently, releasing students from the burden of telephone registration by implementing the process where one can select classes on the Internet.

These advancements are greatly appreciated, however, let's not get complacent with where we are, because we have still not attained our apex of potential. There are still many technological evolutions the student body needs.

Take for instance, the students in the art department. Why is it that our very own design majors are learning on computers that are of obsolete, that the manufacturer, Macintosh, refused them when the University attempted to trade them in for later models? The reason is that the art department is so desperate for new equipment that they had to go on a quest for funding outside of Howard to receive tools for students to adequately learn on.

The lack of technical equipment in the School of Communications is not the only update they have gone up to date. Why do radio production, broadcast, and film majors have to learn on outdated analog systems, when the industry has made a shift to digital formats?

The existing problems that continue to leave the University lagging in the fields of technology are proving harmful for students. It's affecting their education and distracting from the learning atmosphere. How can students be expected to fairly compete in the workforce with an insufficient technological background?

Please note that neither Afghani and Pakistani officials called and wrote two letters urging Jackson to meet with Taliban leaders in Afghanistan, many Americans wondered why acceptance of such an offer would be an option at all.

And while Jackson's achievements are an influential civil rights leader and masterful public speaker are noted and appreciated, it seems a bit strange that this self-proclaimed diplomat would find it a good idea to even consider negotiating or making appeals to an enemy, which they have harassed, participated in, or conspired to bring the worst destruction and devastation that this nation encountered September 11, 2001.

As our nation considers how to understand the complex nature of recent events, many Americans find it laughable that Jackson, one man, would have the ability to firmly handle such a complicated matter of international scale.

Although Jackson was more than instrumental in the release of the U.S. reconnaissance plane crew in China and extremely mental in the release of the U.S. reconnaissance plane crew in China and extremely mental in the release of the U.S. reconnaissance plane crew in China and extremely mental in the release of the U.S. reconnaissance plane crew in China and extremely mental in the release of the U.S. reconnaissance plane crew in China and extremely mental in the release of the U.S. reconnaissance plane crew in China and extremely mental in the release of the U.S. reconnaissance plane crew, his skills as a negotiator may provide an end to the Middle East conflict. His success in mediating previous international crises may not be the best indicator of what his success would be in Afghanistan. Because the fight against terrorism is an extensive battle for entire nations, one man's influence is not to be overestimated, especially in light of Jackson's negotiations.

For a positive change, let's continue to support our university and its endeavors to provide the student body with the tools they need to succeed in the workforce.

INTEGRATING VALUES
Ademola A. Aiyegoro

In the last few days, the corporate enthusiasm over the news that the University of Maryland, College Park and Howard University School of Law will be forming a joint law library, and its possible implications for the future of law libraries and the public interest, has been overwhelming. This is partly because the University of Maryland, College Park and Howard University School of Law have both traditionally been leaders in the field of law library development and have been at the forefront of many important initiatives in the area of integrating values into the practice of law. The joint law library, it is hoped, will provide an ideal setting for exploring the ways in which values can be integrated into the practice of law and how the library can serve as a catalyst for change.

The joint law library will be a unique opportunity to explore the ways in which values can be integrated into the practice of law and how the library can serve as a catalyst for change. It is hoped that the joint law library will provide a space for dialogue and reflection on the role of the law library as a site for integrating values into the practice of law.

The joint law library will be a unique opportunity to explore the ways in which values can be integrated into the practice of law and how the library can serve as a catalyst for change. It is hoped that the joint law library will provide a space for dialogue and reflection on the role of the law library as a site for integrating values into the practice of law.
In the global equities markets, Kumi works closely with his hedge fund clients to help manage their complex transactions. As a mentor in the Big Brothers/Big Sisters program, his dedication has an even greater influence.

How will you make an impact?
