Hilltop Staff Writer

H. Patrick Swygert poses with the Law students and professors who witnessed an appeal brief to the Supreme Court in support of University of Michigan's affirmative action policy.

Snow Shut Down D.C. and Howard

By David Johnson

Howard's and the University of Michigan is one of the few universities that have not made commitment to diversity.

Some 'Majority' Universities Abandon Minority Programs

By David Johnson

President Bush instituted a program that guarantees college admission to the top ten percent of graduating high school classes. And has advocated the use of race-neutral programs.

Fire Breaks Out in Towers

By Kerry-Ann Hamilton

The fire broke out in the Towers Saturday evening. Above, fire fighters battle the fire after putting out the fire, caused by burning food in room 323.
**Voices & Views**

**What do you think about the increased gas prices?**

**By José A. Williams Contributing Writer**

In light of a possible wave with fuel prices on the way in Venezuela, gas prices have significantly increased—making it a tough decision for many college students.

According to the American Automobile Association (AAA), the average price of unleaded fuel has increased in the past few months by up to 12 cents. As tipped by gas stations, the average price of unleaded fuel for the week was $3.87 per gallon in New York City.

The Motor and Equipment Association claims that domestic vehicles use about 9.4 billion gallons of gasoline fuel each year. Furthermore, American drivers drive more than 1.6 trillion miles per year, which is equal to 14,000 round trips around the world. If gas supplies are approximately eight percent of U.S. oil imports, however, with the threat of war in Iraq, gasoline prices should rise. This has resulted in a decrease in oil supplies.

"It makes it extremely difficult for us to drive around," said mathematics senior Charles E. Schumacher (DNT). "Now we would rather be riding the bus or taking the train because prices will never be the same again." He added that the psychology major said. "That is the way we can know what students want is through students' feedback."

**Larger, More Expensive Chicken Fingers Win**

**By Rob L. Tisdale Hilltop Staff Writer**

The Chicken Finger Test, held by the Psychology and Sociology department, was completed by 1,000 students. The test requires students to choose the most expensive chicken fingers.

The test was a part of a larger project that focused on students' perceptions about the high-priced chicken fingers.

On Jan. 30, 1998, approximately 100,000 students filled out surveys and tried the expensive chicken fingers and the less expensive chicken fingers. The less expensive chicken fingers were preferred by 70 percent of the respondents. But the expensive chicken fingers were agreed with the notion that chicken fingers are considered a high-quality snack.

"We are not surprised by the outcome of the survey," McCants said. "It is difficult to decide which chicken fingers are best and which chicken fingers are not as good."

McCants said that the Food Services Department is all for the chicken fingers that are good and at a good price. "It is not fair to the students that are not able to pay for their meals," McCants said. "The chicken fingers are expensive and I had to start eating other things," said McCants. "The chicken sandwich is something that I can have to enjoy at the Punch Out!"

"The test came in light of students' concerns," Mixon said. "Since I have a truck that is not in good condition, I often think about the possibility of buying a new truck. But the size of the chicken fingers and the less expensive alternatives that we have to offer, students could enjoy other than eating chicken fingers."

"We want to have more programs in the Art History department's mission," Mixon said. "We think about the combination of its success.

"The test to become undergraduates requires training from designing a campus-wide work life plan for the students," the Psychology major said. "We are not sure if we want students to know what students want to have."

McCants said that the Punch Out wants to hear from more of the students so that it can be more of a service to them.

"If we want to have more programs, students need to know what students want to have," McCants said. "The only way we can know what students want is through students' feedback."

"We would like to see more programs that are sponsored by the Department of Dance," McCants said. "We would like to see more programs that are sponsored by the Department of Dance."
Kareem Merrick Makes Bid for Trustee with "Activism"

MERRICK from A2

Kareem Merrick is a candidate for the Undergraduate Trustee position. He believes in the importance of "Activism" and plans to hold a forum every two months to discuss student issues and concerns. "This is the most important portion of our platform," Merrick said. "When dealing with such a large student body it is quintessential to remain visible as well as vocal regarding governing issues," he says.

Preparation for this position has been in the form of community service, political and business experiences. Merrick, a current Teach for America alumni, has served as a Documentator for the United States House of Representatives so as well as an assistant in the Democratic Campaign. In addition, he is a member of the Future Business Leaders of America and has interned with esteemed businesses such as Morgan, Johnson and Rael Graives.

I have the business awareness and speaking skills to interact with the various business leaders on the board," Merrick said. "I believe that from statistics the objectives of the student body within the structure of the board meeting.

According to Merrick, the implementation of his ideas begins immediately. "I do not intend on beginning my duties as trustee when next year's activities are set to begin immediately.

I do not intend to go to another station because too many high prices like that can really hurt your pockets." Since the increase, Williams said he had to take about ten extra dollars out of his expenses because instead of $82, it now takes him to fill up his car.

Many Americans are calling for the Bush Administration to stop using Strategic Petroleum Reserve to solve this problem. However, according to Federal Reserve Secretary Spencer Abraham, the administration is not seriously considering releasing oil from the SPR.

Richard Willingham, a junior architecture major, agrees that stepping into the SPR is not necessary at this point, although he spends $25 to $30 a week to fill up his SUV. "I argue that students need to change some of their traveling habits instead of calling on the government for help," Willingham said. "It is not necessary to tap into the SPR, all resources because the increase in ridiculous.

Willingham said "You never know if a more serious emergency situation will occur in the future, so we just need to lower gas and oil prices so we absolutely need to go.

However, Jim Albert, owner of C.J. Trailways, does not believe that the increase in gas prices will push people to drive less. "If you had a three dollar per gallon gas price, there are probably some people that would look at other means of transportation," Albert said. "But for the most people, will still choose the single convenience vehicle." To reduce gas prices, an article entitled "More Gas Prices Weigh," suggests several things including reducing breaking, using cruise control, driving slower, maintaining an conditioned engine, removing extra weight, combining errands into one trip and using more on our pools.

To meet high priced gas at specified stations in the Metro Area, go to www.gaspricewatch.com.

**Dell Dude** on Marijuana Charges (CBS) - Benjamin Curtis, who goes by the 

* Dell Dude* from the computer company's television commercials, was released from jail Monday after being arrested in Manhattan's Lower East Side on suspicion of trying to buy marijuana. Curtis was arraigned in Manhattan Criminal Court on Monday, said they are convinced a police spokesman said. Queens resident Omar Mendez, a spokesman for the Manhattan company's television commercials, said a when an officer saw him Curtis was arrested at 11:30 a.m. on a warrant charging him with making the purchase from Queens resident Omar Mendez, police said.

**Puncture might have caused Columbia Explosion (CNN) - NASA engineers have released a much-anticipated online security plan, outlining a national strategy to protect computer systems from possible cyber attacks.

"We put plans online under the authority of the National Security Act and have prepared a draft guideline for protecting information systems," the plan said. The action comes after a series of attacks on government systems in recent months.

NASA's move is a significant step forward in the fight against cyber threats, the agency said. The plan, which was released on the agency's website, outlines a strategy to protect the nation's critical infrastructure from cyber attacks.

The plan includes a series of measures to protect government systems, including:

- Regularly testing and improving security measures
- Training employees on how to protect systems
- Working with industry and other stakeholders to improve security

The move comes after a series of high-profile cyber attacks on government systems in recent months, including the breach of the Department of Homeland Security's network in November.

Nikos Kalogerakis, a senior scientist at NASA, said the new plan will help protect the nation's critical infrastructure from cyber threats.

"This is a significant step forward in the fight against cyber threats," he said. "By taking these steps, we can protect the nation's critical infrastructure from cyber attacks and keep our systems secure.

The plan is expected to be updated regularly as new threats emerge and new technologies become available.

**The NATO Deal**

Treaty Organization (NATO) extend its influence in Communist expansion as the Europe, the North Atlantic regional defense alliance. "stability and well-being in The NATO Deal Members agree that an armed However, its 54-year existence make swift decisions, despite Poland, the first thing that World War. Due to the movie, "Polska! yet, there is much more to Poland is populated by Although Poland is mostly varied and is famous for its 9300 lakes, the biggest of which is the Sniardwy, which is 12.9 miles long. One of the oldest spas in Poland is Konstancin on Lake Sniardwy. It has been a resort town since the 16th century and is known for its mineral springs, which lend themselves to irrigation systems. The spa is also home to the oldest opera house in Poland, which dates back to 1755.

**Water Stakes High In Malaysia**

One of the most pressing issues facing Malaysia today is the shortage of water. The country's water supply is primarily derived from the Kelantan and Tenom rivers, which flow through the state of Kelantan. However, due to climate change and increased demand, the water supply has become increasingly unreliable. In response, the Malaysian government has been investing heavily in water infrastructure projects, such as the Kelantan Water Supply Project, which is designed to increase the city's water supply by 50%.

**Secret Nazi Files**

The archives containing the office records of Cardinal Karol Wojtyla, the Vatican ambassador to Berlin from 1959 to 1981, have long been suspected by Jews groups of missing a vital document on the concentration camps. The archives, which are being opened in February 2003, are due to be opened on the occasion of the 60th anniversary of the liberation of Auschwitz. The archives contain important evidence of Nazi crimes, including evidence of the role of the Catholic Church in perpetuating the Holocaust.

**Famine in Africa**

The African continent is facing one of the worst food crises in recent history, as drought and conflict have led to widespread hunger and malnutrition. In countries such as Zimbabwe, two-thirds of the population is reported to be suffering from acute malnutrition, and more than 500,000 people are said to be at risk of dying from hunger. The situation is particularly dire in southern Africa, where dry conditions have led to a failure of the rainy season, resulting in a catastrophic crop failure. The United Nations has declared a famine in parts of Zimbabwe, and international aid agencies are scaling up their efforts to provide emergency assistance to those affected.

**Columbian Rebels Seize Americans**

US officials have confirmed that a group of rebels from the Revolutionary Armed Forces of Colombia (FARC) has seized three US citizens, who were traveling in the jungles of Caquetá province. The rebels have demanded a ransom of $1 million in return for the hostages, and have warned that they will kill the hostages if their demands are not met.

**Water Stakes High In Malaysia**

Malaysia's water crisis is expected to worsen in the coming years, as population growth and increased industrial demand put pressure on the country's limited water resources. In response, the government has been investing heavily in water infrastructure projects, such as the Kelantan Water Supply Project, which is designed to increase the city's water supply by 50%.

President Swygert Honors Law Students Who Filed Brief

LAW from A1

focus point of this whole issue.

Dean of Howard University School of Law, Kurt Schmoke, said that the writing and researching of the brief was an interdisciplinary effort on behalf of Howard's faculty and outside sources.

"One of the main focus points that the University brief touched on is that race conscious measures are constitutionally admissible to avoid discrimination," Schmoke said. "Another point made in the brief is that the University of Michigan is furthering the goals of the United States in having equality."

During the program, the four law students who spearheaded the writing of brief were presented with hard copies of the briefs. Patricia Broussard and Gwendolyn Roberts Majette, the two professors who helped supervise the students, as well as Gregory Berry also received copies.

"I, along with my colleagues were overwhelmed with a sense of accomplishment when we received a hard copy of our brief on behalf of the law students," Hillary Brown, one of the authors of the brief, said. "We were not expecting this, so it was a spectacular moment that I will remember for a lifetime."

"I think that the march is very important because it shows the world that students care enough about the issues to mobilize and organize around them."

The final day for filing briefs in the Supreme Court is February 18, 2003.

Black History Month's Relevance Questioned on Campus

BLACK FROM A2
Luther King Jr.'s "I Have a Dream" speech. It has become a time when little kids learn about Harriet Tubman and the Underground Railroad.

I've seen Black History Month in so many different ways in various places. York said. "At Howard, we attended program exhibits, plays, and other functions that I'm here at Howard, all I see is 1 Have a Dream" posters or Martin Luther King Jr.

According to history Ph.D. student Michael Firven, Black History Month has been reduced to "Black Personality Month.

"We always hear about the great personalities in the past, but we never get into how many different things we have in the history in the dark corners," Firven said. "What's happening in the systems and major systems is what is so important to us.

So why do we have so many systems and major systems that are not important to us? Here is a chance to see knowledge of black history outside the classroom.

"Attending a black institution like Howard, where many of the classes are by and about black people, a lot of students think they are doing their part by just attending these classes," Firven said. "However, there is so much more to be learned about black history than what our professors teach us.

Mixon also taught at Howard History Month is not long enough.

"Black History Month should be celebrated for more than a few days. It should last at least 365 days," she said. "Our rich history cannot be exposed in one month."

Kathleen M. Cargill, Ph.D., a history professor at Howard, agrees with Mixon.

"Black History Month should be all year long, not just one month," Cargill said. "Blacks have always been inhibited in history, why should we continue?"

For more information on Black History Month, please visit the Howard Libraries website at http://www.howardlibra.r.y/BHM/Events.htm.

The world's best investment bank

(urgentonly Magazine, July 2002)

UBS Warburg presents...

Investment Banking 101: From College to Investment Banking

Date: Tuesday, February 11th
Time: 6:00PM - 7:00PM
Venue: Business School Student Lounge, 5th Floor

- "State of the Street" - an overview of Wall Street
- Learn about the industry, investment banking trends, and the role of an Analyst
- Gain insight from a UBS Warburg Managing Director
- Learn how to land a job in Investment Banking from Howard alumni
- Opportunity to sign up for Resume Review/Office Hours

Learn more about the UBS Warburg Scholarship. Business casual attire. Refreshments will be provided.

Junior, Sophomores, and Freshmen strongly encouraged to attend

Resume Review / Office Hours

Date: Wednesday, February 12th
Time: 9:00AM - 10:00AM
Venue: Business School Career Center

- Let our bankers help you create or fine tune your resume
- One-on-one advice on how to prepare your resume
- Drop in to ask any industry or recruiting related questions.
- Sign-up for a time slot at our presentation on Feb. 11th at the CCB for Fri., Feb. 12th

Juniors, Sophomores, and Freshmen welcome - casual attire

www.ubswarburg.com

UBS Warburg is a business group of UBS AG, the largest securities underwriting, trading and investment banking concern in the world. Activities in investment banking are conducted by UBS Warburg, Inc., an indirect subsidiary of UBS AG, a registered broker-dealer and a member of the New York Stock Exchange and the principal exchanges and SIPC in the U.S. This business group engage in sales, trading, and investment banking activities in the U.S. and abroad. CIB Warburg Parke-Bernet, Inc. is a subsidiary of UBS Warburg, Inc. UBS Warburg is an equal opportunity employer. For more information, please visit us at www.ubs.com.
DANCE from A2

The Ralph Bunche International Affairs Center at Howard University is offering a wonderful and exciting opportunity for "undergraduate" students to study abroad.

**LOCATION:**
Ralph Bunche International Affairs Center
2218, 6th Street NW
Second Floor
ATTN: MS. BETTY AIKENS, DIRECTOR

**BROADEN YOUR HORIZON BY VISITING US TODAY!!!**

Businesses Turn Toward Trend of Online Dating

By Jennifer L. Williams

As more Americans turn to the internet to find love, more websites are popping up that fill the niche. Websites like Match.com and BlackPlanet.com are two such examples.

Those users that are justifiably concerned might still find a small problem with web sites like Match.com and BlackPlanet. Despite their relative success, these online dating sites are more and more increasing the general public's experience with online dating services. A study by the American Psychological Association reveals that 29 percent of African-American adults have used an online dating site.

Online dating sites are one of the more advanced methods used by users to search for someone to love. Most users find that using the Internet provides a new and exciting way to meet someone, as well as a chance to be sure that one finds the right match. A recent study found on college campuses indicates that 30 percent of African-American college students are familiar with online dating. Many students are comforted by the fact that they can find a date online that meets their expectations.

While some students may not be entirely sure of the positive aspects of online dating, others feel that making a purchase is a more sensible way to find a date. "I like making a purchase and having it instantaneously in my hands," one student said. "I don't have to worry about whether or not the person I'm seeing is who they say they are." Others feel that by using the Internet, they can find someone who shares their interests and preferences. "I find online dating to be faster and more efficient," another student said. "I can find someone who is just like me." Many users feel that the Internet provides a new opportunity to find love and a chance to meet someone who is different from them.

"It's good when you have a job and you're not your busy, yet you're looking for something," one user said. "I like the idea of searching for someone online and meeting them in person." Other users feel that the Internet provides a chance to meet someone who is not afraid to be sexual. "I can't believe there are so many people online," one user said. "I can't wait to see what I can find!"

On the other hand, many users feel that online dating sites are not as safe as they claim to be. "I don't trust the Internet," one user said. "I think it's dangerous to meet someone online." Others feel that the Internet provides too many opportunities to be deceptive. "I don't trust the Internet," one user said. "I'm afraid of being taken advantage of by someone online." Many users feel that the Internet provides a chance to find someone who is not afraid to be sexual. "I can't believe there are so many people online," one user said. "I can't wait to see what I can find!"

"I'm not sure if I should trust the Internet," one user said. "I don't know who is being truthful." Other users feel that the Internet provides a chance to be honest. "I don't trust the Internet," one user said. "I think it's important to be honest with others online." Many users feel that the Internet provides a chance to find someone who is not afraid to be sexual. "I can't believe there are so many people online," one user said. "I can't wait to see what I can find!"

"It's good when you have a job and you're not your busy, yet you're looking for something," one user said. "I like the idea of searching for someone online and meeting them in person." D’Mello Uses Life Experiences for Debut Album ‘Best Love Story’

By Alysha Cobb

Life & Style Editor

When D’Mello sings, her voice brings a different emotion and flavor to the situation. Her voice can range from a soft, soothing melody to a powerful, emotional anthem. She’s an expert at capturing the emotions of old-fashioned love, beautifully weaving it into a story through her music. She’s a true storyteller, delivering each song on her new album, “Best Love Story,” as if she’s reliving her life experiences.

This newcomer is not your average run-of-the-mill R&B diva—a master storyteller with a unique style and a powerful voice. Her music is a reflection of her personal journey and her experiences in life. She’s a true inspiration to her fans and a role model for aspiring artists.

In this article, we’ll delve into how D’Mello’s life experiences have influenced her music and how she uses her platform to share her stories with the world. We’ll also explore how she balances her personal life with her career and how she stays true to herself in her art. So, let’s dive into the world of D’Mello and see how she uses her life experiences to create heartfelt and soulful music.

You’ve Got Fashion: Internet Shopping

By Jennifer L. Williams

Hilltop Staff Writer

On Howard's campus, you are sure to see a variety of different people wearing a wide range of clothing styles. Too often, someone buys an outfit that they believe is original, only to have their close friends all wear the same thing. What can one do? Shopping on the internet is an option that allows for a greater range of fashion choices.

There are many websites that sell clothing and accessories online. Whether you're looking for a new pair of shoes or a trendy outfit, there are websites for that. However, it can be overwhelming to find the right website that offers quality products at reasonable prices. Here are some tips on how to find the right website for your fashion needs.

1. Read reviews: Before making a purchase, read reviews from other customers. This can help you determine the quality of the products and the customer service.
2. Look for sales and discounts: Many websites offer sales and discounts that can help you save money. Be sure to check for these before making a purchase.
3. Check the return policy: If you don’t love the product, you should be able to return it. Make sure you know the return policy before making a purchase.

With these tips, you can find the right website for your fashion needs. Enjoy your online shopping experience and find your perfect outfit!
'Daredevil' Tries Hard, Falls Flat

By Daniel Harnaman

(DAILY TROJAN)

(U-WIRE) LOS ANGELES

Besides the "Superman" and "Batman" franchises, the most recent successes of "X-Men" and "Spider-Man" have proven that comic-book-to-film adaptations aren't just for comic fans. The latest property to try its luck is Marvel Comics' "Daredevil."

With an interesting hero, a top-notch cast and passionate director, it seems that nothing could go wrong, right? Unfortunately, "Daredevil" comes off flat, uninspired, rather than exciting and interesting.

For those who haven't read the comic, "Daredevil" follows Matt Murdock (Ben Affleck), a blind man who works for justice during the day as an attorney and at night as a superhero. Murdock lost his sight when he was 15-years-old in an accident. When he smokes, however, he found that he could still "see" through the smoke, which had his newfound heightened senses. He went on to become the Kingpin's hired assassin, Bullseye (Colin Farrell).

As Murdock attempts to free his town of the Kingpin's influence, he also crosses paths with another vigilante, Elektra (Jennifer Garner) and the Kingpin's hired assassin, Bullseye (Colin Farrell).

There's a lot to like about "Daredevil," however, despite its problems. The fight choreography of Ching-Yan Yuen is well crafted, showing off the skill, energy and creativity of Hong Kong cinematic stunt. The actors were well cast, as Affleck and Garner have genuine chemistry and bought the romantic angle to the story without seeming too out of place or forced. Finally, director Mark Steven Johnson's work shows that he really cares about "Daredevil"—boasting a moody and a comic. His positioning comes through as he fuses the story of Murdock, rather than simply taking the approach of splitting the character development between the hero and the villain.

This approach is, however, the biggest problem with the film. Because the movie focuses so much on Daredevil, there is not enough attention paid to the supporting cast. The lack of development for Elektra, Kingpin and Bullseye's characters not only takes away the back story of three genuinely interesting characters but also leaves the audienceyi no engaged in the story.

Also, the sequences between "Daredevil" and "The Kingpin's absorber" in Bullseye perfectly.

Colin Farrell stars alongside Ben Affleck in Daredevil.

Daredevil tops weekend box office charts grossing $43,500,000 but receives last luster reviews from critics.

(LOS ANGELES) (U-WIRE) LOS ANGELES

May Cry 2" comes on two DVDs—one tells the story of "Devil May Cry," Capcom decided to make a sequel, which was released last month. "Devil May Cry 2" is an easy game for the most part. The original was set at a perfect difficulty level. It let your skills build up on the enemies you fought. If you weren't skilled enough, the game helped you through.

But the original "Devil May Cry" was also able to straddle the fine line between hard and fun, creating a challenging and enjoyable game you felt accomplished in beating, even on normal setting. Normal on the sequel is too.

There is no doubt the game has quality graphics, but it is still not perfect. "Devil May Cry 2" is an easy game for the most part. The original was set at a perfect difficulty level. It let your skills build up on the enemies you fought. If you weren't skilled enough, the game helped you through.

But the original "Devil May Cry" was also able to straddle the fine line between hard and fun, creating a challenging and enjoyable game you felt accomplished in beating, even on normal setting. Normal on the sequel is too.

Game Review: Devil May Cry II

By Terri Adelhamons

The Messenger

(U-WIRE) COLUMBIA, Mo. - In the realm of gaming, people have come to expect nothing short of high quality. One of these expectations is the sequel never seems to live up to the original. Capcom has always been notorious for delivering a lackluster sequel. It seems to work for the "Devil May Cry 3" of the genre.

"Devil May Cry" was able to achieve the same thing with "Devil May Cry 3." The story is better, the environments are better, but the game is still not up to the standards set by the original. It is not as good as the original, but it is still an enjoyable game.

"Devil May Cry 3" is an easy game for the most part. The original was set at a perfect difficulty level. It let your skills build up on the enemies you fought. If you weren't skilled enough, the game helped you through.

But the original "Devil May Cry" was also able to straddle the fine line between hard and fun, creating a challenging and enjoyable game you felt accomplished in beating, even on normal setting. Normal on the sequel is too.

DARE from B2

interesting characters but also means that Daredevil has to carry the story by himself. The problem here is that Johnson attempted to show too much development of Murdock, as he goes through several rushed metamorphoses rather than one or two.

Murdock, as he goes through a large number of fight sequences. Most of the sequences are far too dark; almost in the point of making the images unrecognizable. Although the original goal was to make the film feel gritty and more "real," many sequences simply come off as vacuous. This is inexcusable because the darkness masks the creative stunt choreography. Johnson proves that in almost every fight sequence, he doesn't know how to film Hong Kong-style action, choosing to push the camera in and out quickly rather than letting the camera sit back and take in the sequences fully. Hong Kong-style choreography has sometimes been compared to "comic book dance" instead of showing the beauty of the entire dance. "Daredevil" chooses to divert the audience's attention by showing only portions and hiding the rest of the dance from the screen.

While "Daredevil" had its moments, there were few and far between. For every cool, stylish fight sequence there is another that is too slow or too frantic. For every good fight scene, there is one that is almost impossible to decipher. And for every layer of character development the filmmakers tried to show, Murdock, there's less for the supporting characters. While there was a lot to like about "Daredevil," ultimately it falls short of expectations and its potential.

FASHION from B1

Additional, intricate and delicate dresses and gowns are available at this site. Additionally, Verzzano offers various clothing from designers. For men, the site offers various clothing from Versace, Phat Farm, Polo, Ecko, Enyce, Phat, and various other designers. For men, the site offers various clothing from Enyce, Phat Farm, Polo, Ecko, and numerous others. Because of its uncluttered layout and easy point and click navigation, this site is both easy to navigate and effortless to buy from.

The game Devil May Cry II disappoints. The game Devil May Cry II disappoints fans as the first edition set a huge precedent for gamers.

CRY from B2

The best part of the game is the crisp and accurate controls. The characters have some slick new moves. Dante can now double jump, run along walls, jump and fire straight down and roll out of harm's way. All the moves make him look like a complete badass, and they add to the feel of the original. Control is just as tight as the first, so pulling off every move is extremely easy. This makes the game fun and exciting to play. "Devil May Cry II" might disappoint high expectations of fans of the original, but it's definitely worth playing.

We Need To Fight For Frenchie

Over the past week, many people have expressed their outrage over the dismissal of Frenchie Davis from the television show, "American Idol." This decision has sparked a furor across the nation, as many believe that Frenchie was unfairly dismissed because of her race.

Our View:

We believe that the dismissal of Frenchie was race-related.

In America, there are many strong black women who have made significant contributions to our society. However, many are still held back by systemic racism and inequality.

The NAACP is Recognized by UN

The National Association for the Advancement of Colored People (NAACP) has been recognized by the United Nations as a "recognized multinational organization," which means that it is an organization that has special consultative status with the UN.

Our View:

We are proud that the NAACP has been recognized as an organization for world leadership.

School Politics Are Serious!

If you have been keeping up with the developing story on the NAACP's decision to support student government positions, we do not want to be the ones to bring you bad news. However, we feel it is our duty to inform you of the serious nature of this issue.

Our View:

Students who run for student government positions need to take elections seriously.

In conclusion, we urge all students to participate in the election process and to make informed decisions. The NAACP's decision to support student government positions is a significant step toward creating a more inclusive and equitable society.
