Mock Trial Debate Team Wins Big at Tournament Next Week

The Howard University Mock Trial debate team finished first overall as it competed against teams from across the country this past weekend and took home with them the $12,000 needed to fly to Des Moines, Iowa where they will compete for the national gold flight championship in St. Paul, Minn. The first squad that came in third placed third overall in the national competition against schools such as Yale, Stanford, New York University, Berkeley, and many others.

Witness awards. Dirocie won for her performance as a witness, and Horton and several other team members, Wagner, who is head captain of the debate team, captured the award for her performance as a forensic anthro­pologist. The team won because they had been working on the case all year, Walker said.

What are your chief concerns about coming back to Howard Next Year?

I would like to see an improvement in the registration process.

I think we need better teachers.

For me, my chief concern is the lack of security on campus.

The focus on academics needs to be improved.

Improvement in the soccer program is a concern of mine.

The lack of diversity in the student body is a concern.

The need for better facilities is a concern.

The need for better student support services is a concern.

The need for better financial aid support is a concern.

I would like to see more involvement of students in the decision-making process.

I would like to see more resources dedicated to student success.

I would like to see a more diverse faculty and staff.

Black CollegeBrandon 2001: Buil Bristol

Despite its recent presence in America's campus community, "Black College Brandon 2001: Bristol Bound" is unaccustomed to the sort of favorable attention its organizers would like it to receive. The third effort in the series of College Brandon events scheduled for the summer, the annual event will focus on bringing together students from historically black colleges and universities for a week of academic enrichment and cultural exchange. The event is scheduled to take place from June 15 to 21, at Howard University's campus in Washington, D.C.

The event will feature a variety of academic and cultural programs, including workshops, seminars, andSLPES lectures. Students will have the opportunity to engage with renowned scholars and experts in a range of fields, including humanities, social sciences, and the arts. The event will also provide students with a chance to explore the culture of U.S. cities such as New York and Atlanta.

The organizers of the event hope that it will serve as a platform for students to share their knowledge and experiences, foster new connections, and build a sense of community among black college students. The event promises to be a transformative experience for those who participate, offering a chance to gain insights into different perspectives and ideas, and to explore new possibilities for their academic and professional futures.

For more information, contact the organizers through the website: www.blackcollegebrandon2001.org

Washington D.C. Cenus Makes Efforts to Ensure

By Havard Delicatessen

WASHINGTON D.C. — Census takers went door-to-door this week in a national effort to ensure that all citizens are counted in the 2010 census.

The Census Bureau has set a goal of completing 90% of the population counts before the end of March. However, some areas have already reported low response rates, particularly in areas with high percentages of African Americans and Hispanics.

The bureau has authorized the use of extra workers to help with the census, and has increased its advertising and outreach efforts.

Duke Students Address Internet's Role in Academic Integrity

By Sherry Wright
The Chronicle (Duke U.)

(WURB) DURHAM, N.C. — "My students are not lying, they're just being honest," said John Slaughter, a professor in the business school who's been teaching about the Internet's role in academic integrity for the last three years.

He's not the only one concerned. Duke University administrators, for instance, have been on the lookout for more racist e-mails.

The Virginia NAACP is in an uproar for the third year in a row, as Virginia Governor James Gilmore signed a proclamation declaring April to be Confederate History Month. He placed language in the proclamation condemning slavery, but that was not enough to placate the group. The NAACP claimed, rightfully so, that Confederate History Month celebrates people whose goal it was not to maintain states' rights, but to keep the institution of slavery.

People have the right to celebrate almost anything that they want, as long as it does not infringe on the rights of others. Confederate History Month is an obscene thing to celebrate. True, it celebrates men who fought bravely in a war that we should think about the cause they were fighting for. Does Dixie Ravinia, a German state, celebrate Nazi war veterans? It is doubtful that they do such a thing. However, they are well within their rights to do so.

That is not to say that the NAACP should not be outraged. If anything, the tightrope of such an absurd sentiment shows them that they still have considerable work to do when it comes to achieving their goal of eradicating racism and prejudice in this country. Rather than moving them to try to quash people's free expression, it should spur them to work harder to change people's attitudes. Changing the laws on the books takes us only so far; at some point, we have to change how people think. Confederate History Month is the perfect time for the NAACP not to condemn the existence of the month, but to challenge the celebrants to examine what they are doing and take pride behind such an ignoble cause.

**Ground Zero**

"Player hating" runs wild throughout Howard's campus. Hard-working student leaders are so being mistrusted, maligned and scrutinized for things that are often beyond their control. Sure, it is our job as students to work toward our goals on our own. But why do the tasks fall, but sometimes go unacknowledged?

When the 1998-99 edition of the Bison Yearbook was distributed, the actual copy caused several controversy. The olive green and coral-colored book was the subject of lots of ridicule and what outsiders say means. Of course, there will be people who want to even this after editorial. After all, isn't that what H.U. stands for? "Haters University?" Someone will comment about the class picture, the subject of the writings or even Williams' letter and picture which appears on the back of the book.

So, our message to the Bison Yearbook staff and our campus, is not to let that deter you and your dreams, but, because this is the Yearbook of Howard University, let's continue to lift up the values we hold as students. One of those values is honesty in the way we conduct our business.

This year's edition, "Ground Zero" is one of the best yearbooks Howard University has seen in years. From the silver and black, plexi glass cover to so. The Nation's Largest Black Collegiate Newspaper

**OPEC's Oil Squeeze**

The Hilltop is up in arms this year. Howard's highly motorized campus has seen the increase in gasoline prices over the last few months, reaching as high as $1.50 a gallon in some places. It resulted from a squeeze in oil prices from OPEC countries that started in March of 1973 that eventually pushed the price of a barrel of crude oil up to $34 a barrel, more than triple what it was at the end of last year and a 9-year high. The high prices were a boon on poor people like college students and truck drivers. Economists feared that the rising oil prices could put a brake on our rolling economy. They feared that, despite the binding share of GDP that oil products have, rising prices would get pushed on to consumers and drive down the demand for products that has been driving the economy. They also feared that profits would be squeezed in many areas, triggering an era similar to the oil shortages and high inflation of the mid-70s.

Fortunately, after much pleading and begging from our energy secretary, Bill Richardson, the OPEC countries agreed to raise their oil quotas in order to take some of the gas price pressure. By the middle of the summer, prices should be back to normal. However, the government should not just look at this as yet another crisis averted by diplomacy and move on. This scenario has occurred twice in 35 years. We need to look toward reducing our dependance on foreign oil to power our energy-abusive society. Moreover, we need to take the chance now to reevaluate and retool our dependence on large amounts of energy and on the diesel-intensive cars that are spreading our country this fastly. After an oil scare like this, our government should be looking to provide us with alternative energy sources that are cleaner, cheaper, more efficient, and more renewable than oil.

**Why Diallo and Malcolm F. Are Not The Same**

By Michael Winfield

A through was self-conscious Polish child living in the United States in the 1960s. Joseph Conrad, the author of the novel _Heart of Darkness_, refers to the African as an “archetypal character known as the Prostitute Ahoosha,” as one who is not only a means to an end but also a means in itself. The African is extremely difficult to miss in the movies with jazz-age music, and his presence on the screen is often so subtle that the audience is not even aware of it.

I find it ironic that Conrad’s central character is the prostitute, as she is not the heroine of the story. The Prostitute Ahoosha is the central character in the novel _Heart of Darkness_, and her story is told from her perspective. The story revolves around her experiences in the jungle, where she is forced to survive on her own and to depend on her own resources.

The story of Diallo and Malcolm F. is not the same. Diallo is a real person, while Malcolm F. is a fictional character created by Conrad. The story of Diallo and Malcolm F. is not the story of a prostitute, as it is not the story of a woman who is reduced to her sexuality.

The story of Diallo and Malcolm F. is the story of a man who is forced to survive in the jungle, where he is forced to rely on his own resources and to depend on his own strength. The story of Diallo and Malcolm F. is the story of a man who is forced to navigate the dangers of the jungle, where he is forced to rely on his own intelligence and to depend on his own wits.

Drew had been offered a job in the Academy: Art and with him as his assistant. "Malcolm," Nicholas said. "I'm happy you decided to accept the offer. I'm looking forward to working with you."

"Thank you, Nicholas," Malcolm replied. "I'm honored to be part of this team."

The project was a huge opportunity for Malcolm, as it was the first time he had been offered a position in a major film. Malcolm knew that he had to make the most of the opportunity, as he was determined to prove himself and to show the world what he was capable of.

The movie, filmed in the studio and released in theaters, was a huge success. It earned multiple awards and was praised by critics for its powerful storyline and its depiction of the struggle for justice.

Malcolm, who had been offered a job in the Academy, was thrilled to be part of the project. He knew that he had to make the most of the opportunity, as he was determined to prove himself and to show the world what he was capable of.

A s I flipped through a recently distributed magazine, I was struck by the large number of advertisements for BET (Black Entertainment Television). The magazine was filled with ads for BET shows and movies, as well as ads for BET products and services. As I scanned through the magazine, I was amazed by the sheer number of ads for BET.

The ads were everywhere. On the cover, in the middle of the magazine, and even on the back. It was as if the entire magazine was dedicated to promoting BET.

I was surprised to see the number of ads for BET in the magazine, as I had always thought of BET as a niche network. However, the ads made it clear that BET was a major player in the entertainment industry.

The Twin Souls of Shantrelle Lewis

By DEBBIE ANDERSON

Hilltop Staff Writer

I'm probably the most loved and hated person that you'll probably ever meet in your lifetime. I'm also a victim of some ridiculous stereotypes about black people, like that I'm thick or chatty. And since showing off my good opinion, sometimes people just don't get along with me. In this case, my friend Saundra, who I used to call "Sandy," now calls me "Debbie." She is the only person that I really trust.

We're both the same height and build, but I have more curves and dimples. We've been friends since we were kids, but we've never really been close. People say that we're "opposites attract," but I disagree. We're just different in so many ways.

But there's one thing that we both enjoy: music. We're both huge fans of gospel music, and we always have a fun time listening to it. That's how we first became friends, actually. We used to go to church together, and we'd sing duets in front of the congregation. We even won a society award for our performance.

But we're not just friends; we're also sisters. We share a lot of the same values, and we always try to help each other out. That's why we decided to start our own magazine, Essence.

The magazine started out as a hobby, but it quickly grew into something much bigger. We wanted to create a platform for black women to share their stories and experiences. We wanted to show the world that black women are just as capable as anyone else.

Now, Essence is a huge success, and we're both very proud of what we've accomplished. But it hasn't been easy. There have been times when we've disagreed on what we should publish, or when we've had to work long hours without pay. But we've always stuck together, and that's what makes us such a strong team.

We're not just a magazine; we're a family. We support each other through thick and thin, and we always have each other's backs. That's what makes Essence so special, and that's what makes us so successful.

So there you have it. Shantrelle Lewis and I, two sisters with a dream. We're working hard to make our mark in the world, and we're not afraid to take on any challenge. We're Essence Magazine, and we're here to stay.

NEVER A WOMAN WITHOUT A MAN

I eliminate
All the Newports I've smoked
All the tears I choked
All the lies I clucked
All the illusions of gun smoke
All the bills I've collected
All the things I've developed
And all the losses I've let
All the good people I preached
And all the things I've seen
All the conversations
And deep meanings
And when life wasn't real
I yet still fulfilled
And I eliminate
All those who hated on me
And never met me
All the poets who never felt me
And all the words I never spoke
All the times I was broke
but I embrace
all those who have been
by my side
And those who never made it
through the wind
and it's rain
I thought about taking my own life
but for the mornings
I had conversations
with God
And felt the light
And for all the rivers I have cried
To this day I won't lie
When I say one day
this war will end
But my words will forever stand
And yet I am never a woman
without a man
