Science, Engineering No Match for Howard

BY SHIVON NEFOSTE

In the latest report on STEM degrees, Howard University has been ranked 12th among historically Black Colleges and Universities. The report, conducted by the National Science Foundation, highlights the importance of STEM education and the need for increased diversity in these fields. Howard University, along with other historically Black institutions, continues to be a leader in preparing students for careers in science, technology, engineering, and mathematics. This is a testament to the university's commitment to providing a quality education that prepares students for success in their chosen fields.
Students Practice Safeness with Fake Phallus

BY JESSICA LEWIS
Staff Writer

Latex condoms, diaphragms, colored condoms and slippery, non-latex toys were all-inclusive in the safe-sex discussion at "Sexual Awareness: Let's Talk About Sex."

The event, hosted Thursday evening by Phi Beta Sigma Fraternity, Inc. and featured Community Health Educator Maynor Corea.

"The purpose of the event was to educate the Howard community, said Steven Page, senior radio, television and film major. "It's an annual event and our third since I've been here."

The event featured a game in which audience members exchanged names with other audience members on index cards to track sexual history and to determine who was infected in the game.

The event also featured a sex between one male to put a condom in a fake penis. Between the fun and games, Corea broke down the different stages and forms of Sexually Transmitted Infections (STIs).

"To illustrate the devastating nature of the STIs, Corea came prepared with a flip book of infected private parts. Although some people laughed unabashedly and others left, senior television production major Courtney Robinson said, "That's reality. It's funny until it's you."

Corea gave statistics, stating "90 percent of people living in the U.S. have Herpes I. That's like the flu. It's the one you don't have to have intercourse to get." In addition to these startling facts, Corea said, "So for men, once you're out of love just moderate."

He noted that the best way to prevent an STI is through protection, pointing out that latex is the best form of protection as it only prevents propagation.

"Not all of people say that, 'If I don't have oral or vaginal sex, I can't get an STI.' But it can still get in your throat," Corea said.

"But we are able to tell that you took a pill if you have had an STI before, you won't get it again."

You can get the same STI twice by having unprotected sex, according to Corea.

"Who wants condoms?" He ended the night by asking, "Who wants condoms?" He passed out free contraceptives to anybody that wanted them.

Community Health Educator Maynor Corea demonstrated and presented several methods of sexual protection and contraception.

Matthew McConaughey

"I've never practiced in a muscle, and I never have," he said. "But I think I've been in a dark school of acting."

"I think they're better in sports and we're better in academia," said Janaya Carter, junior, legal communication.

Howard, Hampton Get Ready To Square Off for<br>Bragging Rights and The Title of the “RealHU”

Scouting Report

Hampton Pirates

BY DEONTAY MORRIS

Sports Editor

September 12, 2008

The Hilltop opponents meet this Saturday when Howard University travels to play Hampton in the second biggest rivalry in the District of Columbia, the Howard-Hampton Rivalry. The game will be a tough test for both programs as they battle to gain the upper hand in the second game of the season.

Hampton University is coming off a season-opening win over Norfolk State University on Saturday last week. Hampton’s defense played well, shutting out the Mid-Shore Force to a 0-0 tie, while the offense was led by Junior Quarterback T.J. Bynes who threw for 200 yards and 2 touchdowns.

Howard University has lost their first two games of the season and is looking to get their first win of the year. The Bison have struggled on both offense and defense, and are looking for a spark to turn things around.

The game will be played at the Williams Stadium in Bladensburg, Maryland. Kickoff is set for 3:00 pm on Saturday. The game can be seen on WUSA 9.

Howard head coach, Ron Schuman, is looking for a win to get his team back on track.

Hampton head coach, Rick Comegy, is looking for a win to get his program back on track as well.

The game will be a tough test for both programs as they battle to gain the upper hand in the second game of the season.
Facebook Ads and Texting Threaten Privacy, Harm Transparency

Perspective

A lot of older folks are looking at ways to use Facebook to engage with their kids and grandchildren. The site is becoming a source of information and entertainment, but it is also becoming a source of frustration for some people.

The site can be a source of conflict, especially when it comes to privacy. Facebook users can share everything from photos to personal information, but they are not always aware of how their information is being used.

The site can also be a source of anxiety, especially for children and teenagers. They may not be aware of the dangers of sharing personal information online.

The site can be a source of misinformation, especially when it comes to political issues. Some people may not be aware of the sources of information they are sharing, and they may not be aware of the consequences of sharing that information.

The site can be a source of confusion, especially for older people who are not familiar with technology. They may not be aware of the different ways they can use the site, and they may not be aware of the different options they have for sharing information.

The site can be a source of frustration, especially when it comes to privacy. Facebook users may not be aware of the different ways their information can be shared, and they may not be aware of the different options they have for protecting their privacy.

The site can be a source of improvement, especially when it comes to privacy. Facebook is working to make its site more secure, and it is working to educate users about the different ways they can protect their privacy.

The site can be a source of improvement, especially when it comes to transparency. Facebook is working to make its site more transparent, and it is working to educate users about the different ways they can access information about how their data is being used.

The site can be a source of improvement, especially when it comes to harm. Facebook is working to make its site less harmful, and it is working to educate users about the different ways they can avoid harmful situations.

The site can be a source of improvement, especially when it comes to education. Facebook is working to make its site more educational, and it is working to educate users about the different ways they can learn from the site.

The site can be a source of improvement, especially when it comes to support. Facebook is working to make its site more supportive, and it is working to educate users about the different ways they can support each other.

The site can be a source of improvement, especially when it comes to growth. Facebook is working to make its site more growth-oriented, and it is working to educate users about the different ways they can use the site to grow.

The site can be a source of improvement, especially when it comes to innovation. Facebook is working to make its site more innovative, and it is working to educate users about the different ways they can use the site to innovate.
