ONE of the old philosophers is credited with having said, "After all we do those things which we really want to do." An analysis of our conduct from day to day really proves the correctness of this philosophy. Our accomplishments, yours and mine, are the direct result of a determination to accomplish. Strange to relate, many of the world's greatest accomplishments are the outgrowth of dreams — sometimes just day dreams. Dreams only become realities when the dreamer has the determination to see them through.

The idea that you would attend Dental College and become a member of a noble profession was, at one time, more or less a dream. Remember? You possessed the determination to make that dream a reality.

And peculiar as it might seem, all of the time that you have been accomplishing your object, you have been dreaming of other things — among them a successful professional career. Your ability to make this dream a reality again depends upon your determination; however, you must not handicap yourself by an uncomplimentary introduction to your patients. Remember —

"A dentist is accepted by his patients as being as modern as his surroundings indicate."

Ritter's 40 years of experience is yours for the asking.

OF COURSE

...you'll want your own x-ray unit

FREQUENT use of the x-ray is one of the ways by which the public is learning to distinguish the progressive dentist. More and more the leaders in the profession are installing their own x-ray units.

They find that making their own radiographs enables them to render better service, to make their time more profitable. They soon become expert in interpretation. And this ownership of an x-ray unit proves to be not an expense, but an investment from which they get a steady yield.

The Victor CDX Dental X ray Unit has been a great factor in creating this vogue for individual ownership. The Victor CDX

hangs suspended from the wall. It is electrically safe. Both transformer and tube, insulated in oil, are enclosed in the tube head. There is no high tension current exposed anywhere. You and your patient can touch the CDX anywhere while it is in operation. There is no danger of shock.

Let us send you the facts drawn from the experience of successful practitioners about this modern unit. It makes radiography almost as simple as photography. As you start out, you cannot afford to be without this important tool of your profession. Ask us for details of monthly payment plan.
